EDUCATION

Kalinga Institute of Industrial Technology (KIIT)

Bachelor of Technology in Computer Science Engineering

2022 -- 2026

CGPA: 8.7/10

D.A.V Public School, Khagaul

CBSE Class XII -- 90.50%

2021

D.A.V Public School, Khagaul

CBSE Class X -- 92.16%

2019

EXPERIENCE

Technical Intern (Software Engineer), Cisco

Jan 2026 -- Jun 2026

- Built a VM Snapshot Management pipeline using GitHub Actions and `govc`, automating snapshot operations across 5 vCenter hypervisors with email notifications.
- Implemented a Restricted VM IP Guard in the deployment pipeline to block accidental deployments to protected VMs, backed by 24 unit tests.
- Validated CIQ OnPrem upgrade flows across Hyper-V, KVM, and ESXi hypervisors for the FY26Q3 milestone.
- Redesigned test execution email notifications into a unified 14-column HTML table with aggregated summary for easier cross-app comparison.

Network Analyst Intern, Indian Oil Corporation Limited (IOCL)

Dec 2024 -- Jan 2025

- Analyzed LAN/WAN architecture including MPLS and SD-WAN across refinery network infrastructure to identify performance bottlenecks and security gaps.
- Evaluated Cisco router and switch configurations, proposing optimizations to improve reliability and reduce downtime.
- Documented findings and recommended mitigation strategies for identified vulnerabilities.

PROJECTS

DevOps Copilot

Technologies: Python, Flask, Groq, LLaMA 3.3, HTML, CSS, JavaScript

- Built an AI-powered DevOps assistant that debugs logs, generates `Tools: GitHub, Render, Marked.js, Highlight.js` Dockerfiles, writes GitHub Actions YAML, and explains infrastructure issues through a terminal-style chat interface.
- Integrated Groq-hosted LLaMA 3.3 with a Flask backend and added Markdown rendering, syntax highlighting, and quick actions for common DevOps workflows.

RAG Document Chat

Technologies: Python, Flask, FAISS, Sentence Transformers, Groq, PyPDF2

Tools: GitHub, Render, NumPy

- Developed a Retrieval-Augmented Generation application that allows users to upload PDF/TXT files, generate embeddings, retrieve relevant chunks using FAISS, and ask context-grounded questions.
- Built the full document pipeline including text extraction, chunking, vector indexing, and LLM-based answering to improve relevance and reduce hallucinations.

AI Research Agent

Technologies: Python, Flask, Groq, DuckDuckGo Search, Wikipedia API

Tools: GitHub, Render

- Built a tool-using AI agent that performs web search, Wikipedia lookup, and mathematical calculations before generating final responses.
- Implemented multi-step tool-calling orchestration in Flask using Groq native tool calling to improve factual accuracy and support real-time information retrieval.

CI/CD Pipeline

Technologies: Python, Flask, Pytest, Docker, GitHub Actions

Tools: GitHub, Docker Compose, GHCR

- Built an end-to-end CI/CD pipeline that automatically runs 15 unit tests, builds a Docker image, and pushes the image to GitHub Container Registry on every push to main.

SKILLS

Programming: Python, Java, C, SQL, JavaScript

Web: Flask, HTML, CSS

AI/ML: Scikit-learn, Pandas, NumPy, FAISS, Sentence Transformers, RAG, LLM Tool Calling

DevOps/Tools: Git, GitHub, GitHub Actions, Docker, Kubernetes, YAML, VS Code

Cloud/Infra: AWS, vSphere/vCenter, Hyper-V, KVM

Coursework: Data Structures & Algorithms, OOP, DBMS, Operating Systems, AI/ML

CERTIFICATIONS

CCNA (Cisco Certified Network Associate) -- Cisco

Cisco AI Technical Practitioner -- Cisco

Docker for Beginners -- Udemy

Kubernetes for Beginners -- Udemy

AI Agents and Agentic AI in Python -- Generative AI

AWS Cloud Foundations and Machine Learning -- AWS Academy
