EDUCATION

Kalinga Institute of Industrial Technology (KIIT) Bachelor of Technology in Computer Science Engineering	2022 – 2026 CGPA: 8.39/10
D.A.V Public School, Khagaul CBSE Class XII – 90.50%	2021
D.A.V Public School, Khagaul CBSE Class X – 92.16%	2019

EXPERIENCE

Technical Intern (Software Engineer), Cisco - Built CI/CD automation workflows using GitHub Actions for deployment validation and engineering productivity. - Developed a VM Snapshot Management pipeline using govc and implemented Restricted VM IP validation to improve deployment safety. - Validated CIQ OnPrem upgrade workflows across Hyper-V, KVM, and ESXi, while enhancing execution reporting with unified HTML summaries. - Automated workflow tracking with Jira integration and supported issue resolution.	Jan 2026 – June 2026
Network Analyst Intern, Indian Oil Corporation Limited (IOCL) - Analyzed LAN/WAN infrastructure (MPLS, SD-WAN) and evaluated Cisco network devices to identify performance and security improvements. - Documented network architecture and recommended reliability improvements.	Dec 2024 – Jan 2025

PROJECTS

RAG Document Chat GitHub <i>Python, Flask, FAISS, Sentence Transformers, Groq, PyPDF2</i> - Built a Retrieval-Augmented Generation (RAG) application for PDF/TXT document question answering. - Implemented document extraction, chunking, embedding generation, FAISS indexing, and LLM-based retrieval. - Improved response relevance while reducing hallucinations using semantic search.	Live Demo
AI Research Agent GitHub <i>Python, Flask, Groq, DuckDuckGo Search, Wikipedia API</i> - Built an AI research agent supporting web search, Wikipedia lookup, and mathematical reasoning. - Implemented multi-step tool orchestration using Groq native tool calling for accurate responses. - Integrated external knowledge sources for real-time information retrieval.	Live Demo
Breast Cancer Prediction Web App GitHub <i>Python, Flask, Scikit-learn, Pandas, NumPy</i> - Developed a machine learning web application to classify breast tumors using 30 clinical features. - Compared Logistic Regression, Random Forest, SVM, Gradient Boosting, and KNN models to identify the best-performing classifier. - Built a Flask-based interface for real-time prediction.	Live Demo

SKILLS

Languages: Python, Java, C, SQL, JavaScript
Frameworks: Flask, HTML, CSS
AI/GenAI: Scikit-learn, Pandas, NumPy, RAG, LLM
DevOps/Cloud: Git, GitHub Actions, Docker, Kubernetes, AWS, VMware vCenter, Hyper-V, KVM
Core CS: DSA, OOP, DBMS, AI/ML, Operating Systems, Computer Networks

CERTIFICATIONS

CCNA (Cisco Certified Network Associate) – Cisco
Cisco AI Technical Practitioner – Cisco
Docker for Beginners – Udemy
Kubernetes for Beginners – Udemy
AI Agents and Agentic AI in Python – Generative AI
AWS Cloud Foundations and Machine Learning – AWS Academy
